

Science Faculty

Advanced Higher Physics

What will I be learning?

In Advanced Higher Physics, you will attend Science 6 periods per week and will study the following topic areas:

- Rotational motion and astrophysics
- Quanta and waves
- Electromagnetism

In addition to knowledge and understanding, you will develop skills and learn how to apply your knowledge to unfamiliar situations

You will also have the opportunity to carry out practical work in an assignment task assessed by the SQA

How will I be assessed?

You will be assessed throughout the year. Your first test will be in September. Further tests will be after each unit. You will also have the chance to do resit tests.

You will also be doing a project which includes a practical investigation and write up.

Your teacher will share with you how to achieve each level with the feedback sheets and tracking interviews, so you know how to improve your result on the next task.

The YouTube channel contains all the lessons and help with tests!

Don't worry if you need additional support to complete your assessments – your teacher will organise this for you!

What does homework look like?

You will receive at least one piece of homework per topic.

The homework you could expect for Advanced Higher can be watching the YouTube channel, research, working through past papers and personal research

See your teacher in class if you need help accessing Satchel One, or if you would prefer to complete the homework on paper instead.
