

Science Faculty

S1 and S2 Course

What will I be learning?

In S1 and S2, you will attend Science 3 periods per week and will study the following topic areas:

- Introduction to science
- Body systems in Biology
- Earth Science in Chemistry
- Energy and Electricity in Physics
- Waves and radiation in Physics
- Chemical reactions in Chemistry
- Living Environments in Biology

How will I be assessed?

All topics in the S1 and S2 course have graded activities. These activities include project work, team tasks, presentations, debates and class tests

These tasks help you demonstrate your understanding of the topic to your teacher. Your work will be graded at bronze, silver or gold level.

Your teacher will share with you how to achieve each level with the feedback sheets and tracking interviews, so you know how to improve your result on the next task. You will also know the level you are working at.

The YouTube channel contains all the lessons and help with tests!

Don't worry if you need additional support to complete your assessments - your teacher will organise this for you!

What does homework look like?

You will receive at least one piece of homework per topic.

The homework for Science can be watching the YouTube channel, research or preparing a presentation

See your teacher in class if you need help accessing Satchel One, or if you would prefer to complete the homework on paper instead.
